

BADEN-WÜRTTEMBERG – Home of forerunners in Artificial Intelligence.

BADEN-WÜRTTEMBERG: ON THE WAY TO BECOMING A LEADING AI REGION

Under the framework of a statewide digitalisation strategy, Baden-Württemberg (BW) wants to become a global lead region for digital change – with a central focus on artificial intelligence (AI). The preconditions are good: in addition to world-renowned companies, our state benefits from highly innovative medium-sized enterprises with outstanding competencies in central AI application fields such as the manufacturing industry, mechanical and plant engineering,

the automotive sector, the healthcare industry, industry-related services and software development. With the Cyber Valley, which unites AI experts from science and industry, one of the top AI addresses worldwide is already at home in the German Southwest. Furthermore, a central strength of our state lies in application-oriented AI research, which benefits from nationwide networks and ensures a smooth transfer of research results into practice.

CUTTING-EDGE AI RESEARCH AT CYBER VALLEY

Europe's largest research consortium in the field of AI with partners from science and industry

digital **LÄND**

STATEWIDE DIGITALISATION STRATEGY

for BW as a lead region of digital change: Already over 400 million euros in state investments in projects and measures

€50
MILLION

for new AI innovation park for companies, start-ups, researchers, talents, investors

DIGITAL HUB KARLSRUHE

Germany-wide key location for development and application of AI

GROUNDBREAKING RESEARCH

by renowned institutes, e.g. MPI, KIT, FZI, Fraunhofer IAO and many more
